

*Dear Professor Martin Rutkis!
Dear Professor Andris Sternberg!*

Accept our sincere congratulations on the anniversary of your Institute of Solid State Physics at the University of Latvia.

Long-term scientific contacts have been connected in the past and are now continuing in the field of research of condensed matter on both synchrotron radiation beams and neutron beams of our IBR-2 reactor. Your school on ferroelectrics, physical methods of interpretation absorbance spectroscopy using synchrotron radiation beams is widely known in Russia.

Your leading research associate, Alexei Kuzmin, takes an active part in the work of the JINR Program and Advisory Committee on Condensed Matter Physics. At present, your colleagues take an active part in the preparation of a scientific program at the NICA Collider, which is being developed at JINR, within the framework of applied research.

On behalf of the Laboratory of High Energy Physics, accept our congratulations.

We wish your team and you personally good health, prosperity, great scientific achievements.

*Director of VBLHEP Vladimir Kekelidze,
Head of the VBLHEP Department Sergey Tyutyunnikov*
